PROFESSIONAL PROFILE

Senior infrastructure administrator and professional engineer with a 20-year career across public-sector logistics governance, heavy civil construction, off-grid renewable energy, and academic STEM leadership. Currently Deputy Bureau Head for the Tigray Bureau of Transport and Communication, leading institutional digital transformation, transit asset stabilization, and post-conflict public utility modernization. Multidisciplinary profile (M.Eng Road & Transport, B.Sc Civil Engineering, B.Ed Physics) bridging geometric and structural civil designs with macro-level policy execution and data center operations.

KEY ACHIEVEMENTS

- ~100M ETB public revenue recovered within 12 months through POS-driven tariff compliance
- Automated Electronic Ticketing deployed across 44 regional transit terminals
- Solar PV cold-chain systems commissioned for 176 off-grid WHO health posts
- 300+ technical and operational roles organized; 42M ETB annual wage deployment
- 10M ETB Regional Data Center capital project delivered
- 1,000+ matrix-standard Physics & Mathematics test items authored for national curriculum

PROFESSIONAL EXPERIENCE

Deputy Bureau Head | Directorate Director, Service & Bus Station Management

Tigray Bureau of Transport and Communication — Mekelle, Ethiopia | 2024 – Present

- Deployed automated Electronic Ticketing System across 44 public transit terminals, replacing manual paper workflows with a unified cloud tracking network
- Recovered ~100M ETB within 12 months via integrated POS infrastructure curbing tariff leakages
- Supervised Regional Data Center setup with 10M ETB capital budget, unifying telemetry and communications
- Mandated GPS-linked speed limiter calibration across commercial transit and government fleet vehicles
- Organized and sustained 300+ technical/operational roles; deployed 42M+ ETB in annual public wages
- Engineered traveler micro-donation module generating 5M ETB for the Regional Veterans Commission

Solar Systems Subcontractor & Technical Installation Lead

WHO — Regional Health Post Restoration Project | 2023 – 2024

- Managed logistics and remote storage protocols for solar PV arrays, battery banks, and medical refrigeration
- Coordinated distribution to 176 off-grid rural clinics across remote Tigray corridors
- Supervised array framing, inverter calibration, and thermal validation securing continuous vaccine cold-chain

Construction Engineering Technician

Global Consulting Architects and Engineers PLC — Mekelle, Ethiopia | Nov 2016 – Dec 2021

- Enforced civil QA via Proctor density, CBR subgrade, and concrete slump tests per ERA manuals
- Lead AutoCAD drafter for highway alignments, drainage cross-sections, and as-built structural plans
- Compiled five years of engineering logs, billing measurement sheets, and milestone briefings

Construction Site Supervisor

Row Consultant | Mullu Hadgu Construction — Tigray, Ethiopia | 2018 – 2019

- Supervised workforce, equipment, and material supply on Adigudem–Adiwejerat road rehabilitation
- Diagnosed subgrade moisture failures and embankment anomalies, preventing structural degradation

Senior Physics Specialist & Mathematics Instructor

Sheba College, Microlink College, New Millennium College & regional high schools | 2001 – 2016

- Lectured modern physics, applied electronics, and calculus at regional private higher-education institutions
- Authored 1,000+ matrix-standard test items for the Ethiopian National Curriculum
- Pioneered classroom integration of interactive PhET simulations in under-resourced science departments

EDUCATION

- **M.Eng, Road & Transport Engineering** — Ethiopian Institute of Technology, Mekelle University (2017–2020)
- **B.Sc, Civil Engineering** — Ethiopian Institute of Technology, Mekelle University (2012–2017)

- **B.Ed, Physics** — College of Natural & Computational Sciences, Mekelle University (2005–2008)

SKILLS & TOOLS

- **Civil & Highway:** Flexible/Rigid Pavement Design, Geometric Layout, Distress Diagnosis, Rehabilitation, ERA Guidelines
- **Materials & Geotechnics:** Proctor Compaction, CBR, Concrete Slump, USCS Classification, Aggregate Durability
- **Energy:** Solar PV Sizing, Deep-Cycle Battery Storage, Inverter Calibration, Cold-Chain Electrical Engineering
- **Software:** AutoCAD, Odoo ERP, POS Networks, GPS Telematics, PhET Simulations, Advanced MS Excel
- **Governance:** Public Policy, Transit Tariff Design, Capital Budgeting, Inter-Governmental Liaison, 300+ Staff Management
